👤 SUMMARY

Frontend Developer with 1.5+ yrs of experience in building web applications with strong expertise in API integration, state management, and responsive UI development.

⚙️ TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, Redux Toolkit, React Router

UI & Styling: Tailwind CSS, Material UI, Bootstrap, Chakra UI, SASS, Responsive Design, Formik

API & Backend: RESTful APIs, GraphQL, JWT Authentication & Authorization, Axios

Databases: SQL, MySQL, PostgreSQL (API integration level)

Testing & Quality: Jest, Unit Testing, Integration Testing, Prettier

Tools: Git, GitHub, Postman, Swagger

🎓 EDUCATION

JNU, Jaipur

Bachelor of Computer Application (BCA)

2022 – 2025

Jaipur, Rajasthan

👥 PROFESSIONAL EXPERIENCE

Neoteric Infotech Pvt Ltd

Frontend Developer

Sep 2025 – Present

New Delhi, India

- Worked on React.js-based web applications with responsive and user-friendly interfaces.
- Developed reusable and modular UI components for dashboards, authentication systems, booking flows, and mock test platforms.
- Integrated RESTful APIs and GraphQL APIs for seamless frontend-backend communication.
- Managed application state using React Hooks, Redux Toolkit, and Context API for optimized rendering and efficient data flow.
- Implemented JWT-based authentication and authorization mechanisms for secure user sessions.
- Handled loading states, caching strategies, error handling, and form validations to improve performance and reliability.
- Ensured cross-browser compatibility and mobile responsiveness using modern CSS and responsive design techniques.
- Collaborated with backend developers, designers, and QA teams to deliver production-ready applications.
- Used Postman, Swagger, Git, and GitHub for API testing, debugging, and version control workflows.

💻 PROJECTS

MockPortal (Mock Test & Exam Preparation Platform – Mobile/Web App) [HTML](#), [CSS](#), [JavaScript](#), [React.js](#), [Jest](#), [REST APIs](#), [GraphQL](#)

Description: MockPortal is a digital platform designed for exam aspirants to practice through mock tests, track performance, and improve preparation using an interactive and responsive application.

- Worked closely with the team to develop a React.js-based mock test and exam preparation platform with a responsive and user-friendly interface.
- Built reusable and modular UI components for mock tests, result dashboards, performance analytics, and user authentication screens.

- Integrated RESTful APIs to fetch mock tests, user results, and performance data, ensuring smooth frontend-backend communication.
- Managed component-level and application state using React Hooks (useState, useEffect, useContext) to ensure efficient data flow and optimized rendering performance.
- Implemented loading states, error handling, and caching strategies to improve responsiveness and reduce API latency.
- Implemented JWT-based authentication and role-based authorization to secure user sessions and protect sensitive user data.
- Ensured mobile responsiveness and cross-browser compatibility using modern CSS practices and responsive design techniques.
- Collaborated with backend developers and UI/UX designers to translate requirements and wireframes into production-ready interfaces.
- Used Postman and Swagger to test and validate APIs, ensuring data accuracy and reliable integration.
- Followed Git-based version control and participated in debugging, testing, and code reviews to maintain high code quality.

Rahi Trip – Tour & Travel Web Application

React.js, JavaScript (ES6+), HTML5, CSS3, REST APIs

Description: Worked closely with the team to build a React.js-based flight booking web application with responsive UI and API integration.

- Worked closely with the team to build a React.js-based flight booking web application with a responsive and user-friendly interface.
- Developed reusable and modular UI components for flight search, listings, booking flows, and user authentication screens.
- Integrated RESTful APIs using Axios to handle flight data, pricing, booking details, and user authentication workflows.
- Managed component-level and application state using React Hooks (useState, useEffect) to ensure smooth data flow and optimized rendering performance.
- Implemented loading states, error handling, and form validations to enhance application reliability and user experience.
- Ensured mobile responsiveness and cross-browser compatibility using modern CSS practices and responsive design techniques.
- Collaborated with backend developers and team members to align API contracts and ensure seamless frontend-backend integration.

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.
